

Abdelmoniem Mukhtar Abunikhaila
Department of Dairy Production,
Faculty of Animal Production,
University of Khartoum, Sudan
Email: abunikheila@hotmail.com
Phone: + 249-18-5316513
Fax: + 249-92-2755060

Qualifications:

- B.Sc. Agric. (Honour), Animal Production, Faculty of Agriculture, University of Khartoum, Sudan.
- M.Sc. (Animal Sci.), University of California – Davis (UCD), U.S.A.
- Ph.D. (Reproductive Physiology) Queens University, Belfast, U.K.

Current Position:

- Professor of Dairy Sci., Dept. of Dairy Production, Faculty of Animal Production, University of Khartoum, Sudan

Experience:

- Teaching, since 1984 to date, both under and postgraduate courses of Endocrinology and Reproductive Physiology, Location Physiology and Dairy Production in Khartoum University and other Sudanese Universities.
- Supervision of undergraduate students Graduation Projects in all aspects of dairy animals.
- Supervision of postgraduate students leading to both M.Sc. and Ph.D. degrees in research themes pertaining to various dairy production aspects including the Camelidae Family.
- Contribution in local, regional and international workshops, symposia and conferences in camel production system.

Research Interests:

- Different aspects of Dairy Production with emphasis on Fertility management, productive and reproductive stressors in dairy animals including the camilidae.

Reasons of Standing for Election

- I do believe that the camilidae sciences did not receive the worth and importance they deserve and their contribution in the livelihood of several millions of people was denied. With full interest and motivation I will contribute with others to fullfil the following:
 1. Planning and adopting of policies and strategies for camel research development and breeding.
 2. Innovative and ideal exploitation of camel byproduct for the welfare of owners.
 3. Encouragement of scientific camel basic and applied researches to promote productivity.
 4. Encouragement of establishing camel research centres in camel indigenous home, while re-emphasise and support of established centres.
 5. Last and by no means least, I belong to the 2nd country, globally-wise, that endowed with the largest camel population 4.3 million heads (2010 Animal census). This wealth is a solid motivation to offer the camelidae Family the value it deserves.

ISOCARD:

- My efforts and motivations will be directed to reinforce and strengthen the links between my country and ISOCARD for mutual benefits.

Position on Advisory/Committees:

- I am a member of the National council for camel Research and Development, which is responsible for all aspects pertaining to camel development in the Sudan.
- I am a member of the Sudan Camel Association (SUCA).
- I am the first researcher in a project entitled “Application of Intermediate Technologies to promote camel productivity in Sudan” project financed by the Arab Foundation for Science and Technology.
