I am DVM and PhD on Parasitology (Montpellier France, 1997). I am senior research scientist. My research has focused on gastro-intestinal parasites, ticks and tick borne diseases, camel's mange and Animal Trypanosomosis and its vectors. My PhD carried out of the epidemiology of camel trypanosomiasis due to *T. evansi* in Mauritania. These works have received awards from the Academic agency of the French speaking countries and the International Foundation for Science. Actually, I am Director of National Centre for Livestock Breeding and Veterinary Research). I manage the administrative, financial, scientific and social matters of the CNERV whose mission is (i) to diagnose animal diseases, (ii) to study the epidemiology of the principal infections in Mauritania, (iii) to search and to explore any method able to contribute to the zoo-technical improvement of the livestock, (iv) to control the food safety originating from animal origin.
