A Sudanese. Veterinarian by training. Pharmacologist. Received Ph.D. degree in Pharmacology from University of Missouri in 1979. Long time career as a university professor (University of Khartoum, King Faisal University, United Arab Emirates University). During the last decade I am heavily involved in camel racing antidope testing. Research is now focused in pharmacokinetics, pharmacodynamics and drug metabolism in the camel. Have a very strong background in analytical chemistry mastering mass spectrometric techniques such as GCMS, GCMSMS, LCMS, LCMSMS and familiar with several instrumental brands like Agilents, Thermo Scientific, Applied Biosystems etc
