Dr El Zubeir, is a full professor at the Department of Dairy Production, Faculty of Animal Production, University of Khartoum. She was awarded UNESCO Fellowship at South Africa and 2 Postdoctoral research stay at each of Free University of Berlin and University of Giessen, Germany. She is an author and coauthor of more than 60 scientific papers in national and international scientific journals and about 18 presentations at scientific conferences and workshop. Professor El Zubeir's research focus on milk hygiene, quality control of milk and milk product with special references to the preservation and safety. Mastitis is one of the popular research topics she deals with etiology, compositional changes and residual effects. Evaluation of milk and dairy products was done including those from both the modern and traditional sector. Currently she is working on a project entitled: Intermediate Technology Interventions and Camel Nomadic Community Development (funded by ASTF).

Publications related to Camelid (Last ten years)
