I am DVM and PhD on Parasitology (Montpellier France, 1997). My research has focused on gastro-intestinal parasites, ticks and tick borne diseases, camel's mange and Animal Trypanosomosis and its vectors. My PhD carried out of the epidemiology of camel trypanosomiasis due to *T. evansi* in Mauritania. These works have received awards from the Academic agency of the French speaking countries and the International Foundation for Science. I was the designated responsible of the group on Camel research and development in Mauritania with the main aim to link various partners, to initiate programs and research development projects and to undertake any activity to improve the health and production of the dromedary in Mauritania. Actually, I am Director of National Centre for Livestock Breeding and Veterinary Research. I manage the administrative, financial, scientific and social matters of the CNERV whose mission is to diagnose and study the epidemiology of the principal infections in of animals in Mauritania and to control the food safety originating from animal origin.
